

Andrea Coluccio

Company: Medigene

Job title: Senior Scientist Translational Medicine

Seminars:

Targeting a Novel Shared Tumour-Specific Antigen with T Cell Receptor Transduced T Cells for the Treatment of Cancer 11:30 am

Utilising transgenic T cell receptor (TCR)-based T cell therapies which are powerful to target TSAs
Representing tumour organoids as reliable and more physiologically relevant models to characterise TSA-specific TCRs in comparison to 2D established tumour cell lines [Read more](#)

Day: Day Two
